MANUAL CUTTING GETS TO NEW **THICKNESSES**

POWER TRIM

Is the high-performance manual cutter, available in a wide range of cutting measures.

Thanks to the availability of the 2.1 and 2.5 meters models, Power Trim suits the business needs of digital print shops, service centers and photo labs.

The cutting thickness up to 2.2 mm also allows holders of UV flatbed printers to easily cut cardboard, plastics, thin panels and high-thickness PVC banners.

OPTIONS / ACCESSORIES

Among the options available are the reel-holder and a lamp for illuminating the cutting area.

The Power model is equipped with reinforced cutting table, a rotating blade cutting head in hardened steel, a fixed blade in painted stainless steel mounted on a sturdy ball-bearing shuttle.

The standard equipment includes a container for the collection of waste and the adjustable alignment guide.
